Parcel Delivery.

Work-Driven Design®

THE FASTER, SMARTER WAY TO DELIVER PARCELS. AND PROMISES.

There's a lot more than packages and envelopes riding on your fleet of trucks. You have a reputation to protect. Your customers count on you every minute of every day to ship and receive the parcels that keep friends and families connected, and companies in business. A package delivered quickly, efficiently, and safely is a promise kept. It's our job at Utilimaster to design and build the vehicles that help you make those deliveries millions of times a day, one fulfilled promise at a time.

UTILIMASTER

Work-Driven Design®

2 Assess

Once we understand your needs, we hit the road—literally. Our engineers get out in the field with your drivers and conduct a productivity audit. We observe delivery processes, route navigation, driver safety, and operational details. At this stage, we often discover seemingly minor opportunities that can translate into major business results.

1 Listen

Before we spec anything, we take the time to understand your business. It's critical that we get to know the bigger context of your fleet operations. Hearing more about your organizational goals, business needs, and challenges helps us think strategically about how to improve your fleet productivity.

3 Design

With a broad business context and a detailed driver experience, we design solutions that are specific to your fleet objectives. Designing with knowledge can make the difference that sets you apart from your competition and delivers measurable returns to your bottom line.

A PROCESS AS EFFICIENT AS YOURS.

No other industry has made the science of logistics more precise. You have every parcel monitored, tracked, and timed from the minute it's received to the second it's delivered. We admire your rigor and share your passion for perfection. Our Work-Driven Design® process is what helps us deliver on our promise of supplying vehicles that are ergonomic for your drivers and efficient for your demanding needs.

5

Optimize

Once your vehicles are delivered, we enter into a new phase: that of a continued partnership. As your vehicles hit the road, we offer services that increase your fleet capacity and savings. And we're always on the lookout for new opportunities that might further your goals. Think of us as an extension of your team.

4

Build

Our production is guided by the latest in continuous improvement methods. As we build your fleet, we are constantly auditing for smoother logistics, more efficient processes, and additional cost savings. This process ensures our deliveries are always on time, on budget, and beyond expectations.

INNOVATIONS THAT SAVE TIME—AND MONEY.

We've been working with many of the world's largest parcel delivery companies for decades. We've ridden along on millions of miles of routes that span from busy, congested cities to remote, rural settings. Along the way, we've learned what works and what needs improvement. That's what drives our desire to innovate to always help you do your job better.

BECAUSE PACKAGES COME IN ALL SHAPES AND SIZES.

Every fleet has a different set of requirements. From the way that your driver interacts with the vehicle to the places where your customers need to ship and receive their parcels. Utilimaster offers a wide range of body types and custom upfits to perfectly fit your packages, and the promises you're delivering.

Truck Bodies

Built on a solid cab chassis, Utilimaster's truck bodies are the industry standard for heavy-duty commercial delivery. Engineered and made tough with FRP, aluminum, and composite materials like DuraPlate, they're all built to deliver optimal performance and maximum versatility.

Walk-in Van

For the ultimate versatility, our walk-in vans have a highly modular stand-up cargo area and multiple door configurations. Lightweight aluminum construction provides a durable, rust-free body for lighter overall weight and increased payload capacity. Low step-in cab and rear doors make entry and exit easy and accessible.

Cargo Van Upfit

Utilimaster has a long history of designing and building custom upfits for virtually every kind of delivery and service business. We've worked alongside, served, innovated, and grown with the biggest fleet brands in the world. Our enhanced upfits and ship-thru facilities have yielded custom packages and specialty options that not only do the job, but do the job better.

Aftermarket Parts

We have thousands of quality aftermarket parts to replace what's broken, or to upgrade your fleets with the latest and smartest technology, including everything from back-up cameras to keyless entry to GPS and beyond. Plus, we have the expertise to come to you and install with confidence.

Field Service

Our field service teams can assess your fleet and recommend new parts and technology to modernize and optimize your vehicles. Then, they'll make sure installation gets done quickly and efficiently with zero downtime, so you can get on the road and focus on your business.

AKME

Mid-Atlantic

THERE'S NO BETTER TIME TO SAVE TIME.

We can spec, customize, build, upfit, and deliver your vehicles from start to finish. There's no need to waste time and money working with multiple vendors for different parts of the process. Utilimaster has the proven expertise and experience to deliver the finest parcel delivery fleets twice as fast as most of our competitors. And as you know, every minute saved translates into more money driven to your bottom line.

One PO. One turnkey resource. One call to Utilimaster will help you deliver on every promise you make.
